ZERO  
EDGE  
KIDS TABLE

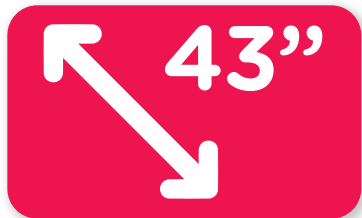

**ZERO EDGE Kids Table** is an innovative interactive and multimedia table from Atlantis Kids Educational.

Available in **43"** and **49"** versions with a **4K Ultra HD display** and **capacitive touch screen** for a maximum of **20 touches at once**.

The entire **metal structure** of the **ZERO EDGE Kids Table**, devoid of edges or potentially sharp parts, ensures a **solid, sturdy** and most importantly **safe interactive table** even for the youngest children.

The **double set of interchangeable legs** makes it suitable for children of all ages between 3 and 19 years. Technologically advanced includes an **Octa Core microprocessor**, significant RAM and Flash memory and **easily upgradable** in the future.

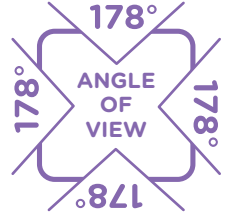

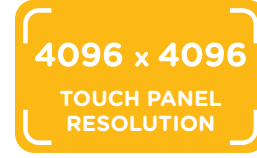

With the **ZERO EDGE Kids Table**, learning and playing have never been easier and safer. This innovative table is not just a piece of furniture, but a powerful educational tool.

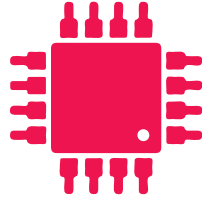

Available in two display solutions: 43" and 49"

# SAFE AND ROBUST

ZERO EDGE Kids Table has been designed and developed with the utmost attention to **safety** and **durability**.

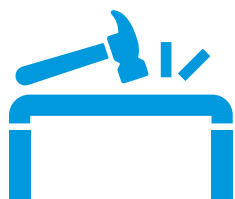

You will not find a **single sharp edge** or any potentially sharp parts. All corners and edges of the table and legs have been extensively rounded and chamfered to ensure maximum safety for youngsters and young children.

This emphasis on safety ensures your children's well-being is always a top priority.

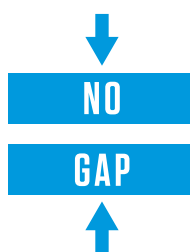

You will also find **no sharp buttons and antennas or visible sockets**. Everything has been designed to be **Super safe**.

**Made for the future.** The entire structure is designed and **made of metal**; this guarantees an almost unlimited product lifetime. You won't even break it with a **hammer**. This durability ensures a secure and long-lasting investment for your educational needs.

The **sturdy metal legs and wide table edging** guarantee exceptional stability that can withstand loads of **up to 250 kg**.

**No Gap:** the absence of a gap between the LCD display and the interactive table structure is essential for the safety of children.

This **prevents 'trapping' of fingers and the accumulation of debris**, protecting the device from damage and facilitating cleaning to maintain hygiene and functionality.

The table is **100% upgradeable**. Thanks to the **READY for FUTURE** technology, the product will **NEVER** die making the investment almost perpetual.

# WATER RESISTANT

ZERO EDGE Kids Table is designed to be **resistant** to accidental spillage of **water and liquids** on its surface.

It can also be **cleaned easily** and safely using a glass or screen cleaning fluid.

# DOUBLE SET OF LEGS

The Atlantis table comes with a double set of metal **"4 Interchangeable Legs"** that can take the table to two different heights: **52cm** and **76cm**.

This makes it suitable for **preschools** (children 3-5 years) as well as **primary, junior and senior high schools** (children 6-19 years).

## WI-FI ANTENNA

A series of **special circular antennas**, covered in plastic material and positioned under the table, have been set up to ensure both adequate wireless connection and the total safety of users.

## ADVANCED MULTIMEDIA CAPABILITIES

ZERO EDGE Kids Table is not just an interactive surface, but a complete multimedia device. It integrates a powerful **pair of 10W speakers**, capable of delivering high-quality sound, enhancing the interactive experience.

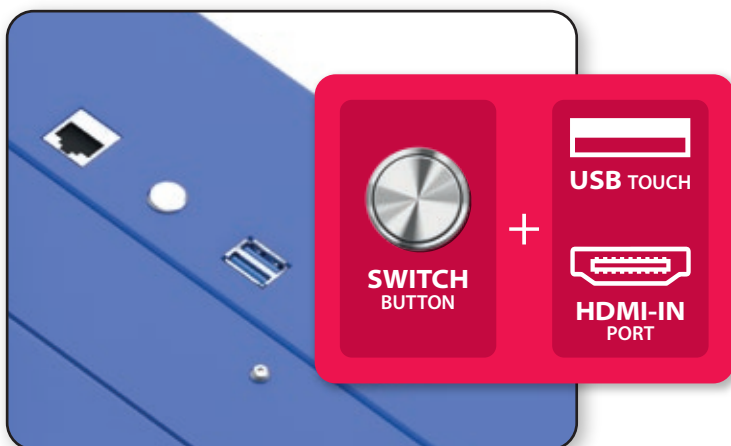

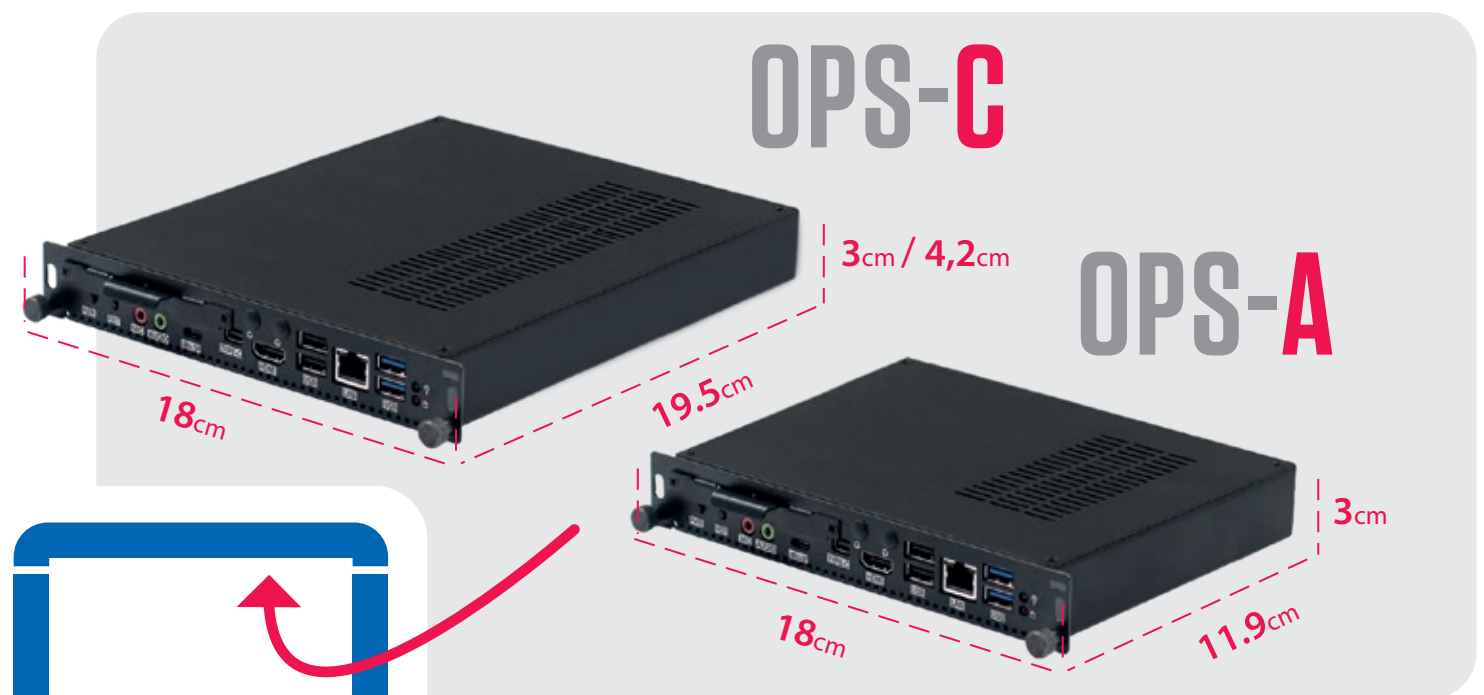

# READY FOR THE FUTURE

# READY OPS 4 FUTURE

ZERO EDGE Kids Table is ready for the future. Its life lasts over time thanks to the **system's upgrade** capability.

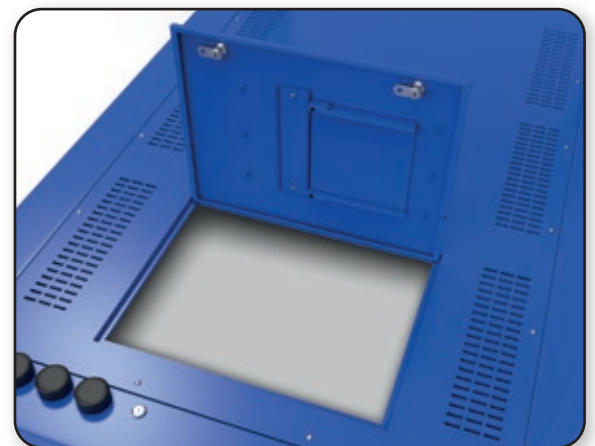

The new **OPS READY\_4\_FUTURE** solution allows you to install a **next-generation 19V OPS** (based on Windows, Android or Chrome OS) inside the table by connecting it to the internal OPS-POWER-DOCK connection slot.

As an alternative to an OPS module, it is possible to **connect an external PC or Notebook** to the table, via the **HDMI and USB-Touch inputs**, and turn the table into an Interactive Multitouch Monitor.

The **switch button** underneath the table allows switching the video signal input and touch connection from the main system to the OPS or external computer.

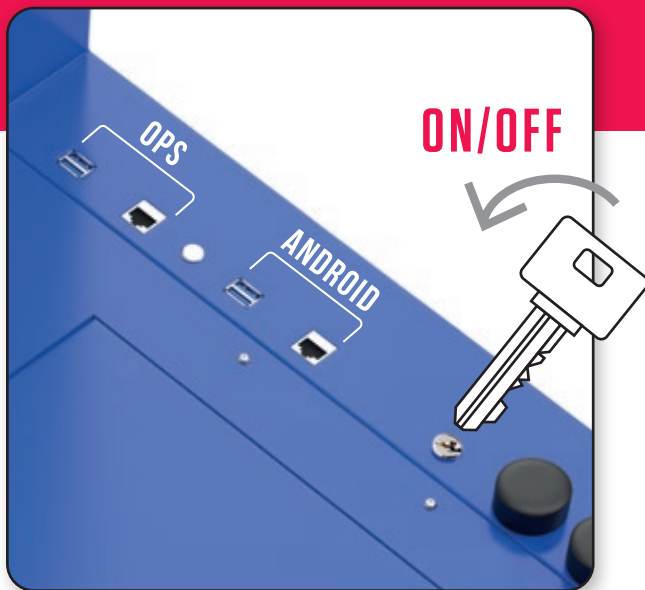

It is also possible to connect an external video source such as a DVD player to the interactive table to turn it into a screen. An **access door** to the internal components is available for any **maintenance** of the system.

# PASS THROUGH CABLE LEG

One of the table legs becomes an electrical connection point.

The connection cable can **easily disappear inside the table leg**, making power access safe and secure.

# INPUT/OUTPUT+LOCK

The table includes a **dual external port replicator** designed for both the built-in Android system and a possible OPS module.

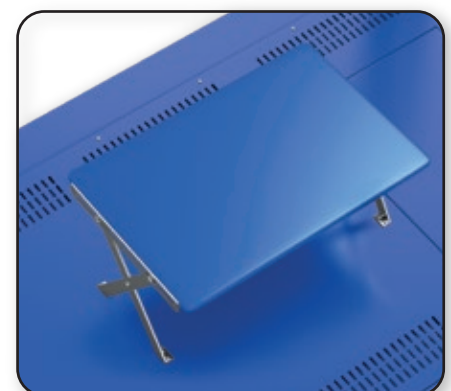

It has **4 USB ports and 2 LAN ports**, which are easily accessible and allow devices such as keyboards, mouse and storage units to be connected, as well as facilitating connection to the network via cable.

The device is **switched on and off via a key switch, Lock Switch**. Compared to a traditional on/off system, this avoids accidental switch-off and only allows the device to be switched on by authorized personnel.

**OPTIONAL**

# MULTI-FUNCTION PANEL

Installable at will, without the need for tools, it can be used to accommodate a **DVD player, a Notebook or a Mini PC**.

# CERTIFICATIONS

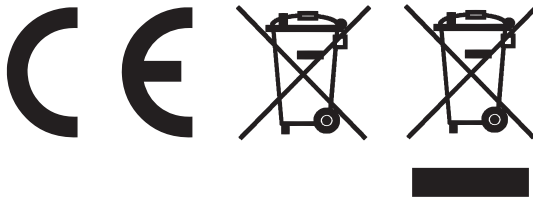

ATL S.r.l. is a company:

- ISO 9001:2015 Certified
- ISO 14001:2015 Certified
- DNSH Certified

Product Conforms to regulations:

- EC 2014/53/EU (including 2014/35/EU and 2014/30/EU)
- ErP 2009/125/EC
- RoHS 2011/65/EU and 2015/863
- REACH 1907/2006
